**New ZetaTalk**

**Earth Changes**

**Announcements**

**Signs of the Times**

**Asteroid Threat**

The Zetas have long predicted that asteroid swarms would be used as an excuse for the debris and moons in the long tail of Planet X. Certainly asteroids are plentiful, and as dark objects they go mostly unseen until they loom close.

**ZetaTalk Prediction 2/22/2003:** *We anticipate NASA will explain the Planet X complex as any number of things, or rather their lackeys, who will natter the word on every Internet or media source that allows their nattering - asteroid bunch, passing comet, unusual comet, Mars closest pass in many eons, or whatever.*

**ZetaTalk Prediction 11/14/2009:** *We have often stated that the debris in Planet X, the moon swirls, are likely to be called an asteroid swarm when they become noticed. They are getting the public ready for such an excuse.*

Just as the Red Filter Revolution is picking up speed, making the fact that objects are swirling about between the Earth and Sun obvious, NASA has mustered forth another asteroid scare. Right on schedule, and just as predicted.

2012 DA14

[http://en.wikipedia.org/wiki/2012\\_DA14](http://en.wikipedia.org/wiki/2012_DA14)

*2012 DA14 was discovered on February 23, 2012, by the OAM Observatory, La Sagra in Spain. If it were to strike the Earth, it is estimated that it would produce the equivalent of 2.3 megatons of TNT. The Tunguska event has been estimated at 3-20 megatons.*

Huge Asteroid Hurling Towards Earth

March 5, 2012

<http://www.dailymail.co.uk/sciencetech/article-2110396/Asteroid-2012-DA14-NOT>

*A 150-foot asteroid orbiting Earth called 2012 DA14 will pass so close to Earth it will fly under man-made satellites orbiting our planet.*

The establishment requested that movies such as the 1998 Armageddon be put forth by Hollywood to prepare the public for this time, when the elite would head for their bunkers and NASA would save the day.

Armageddon

<http://www.imdb.com/title/tt0120591/plotsummary>

*After New York City is damaged by hundreds of small meteorites, NASA discovers an asteroid the size of Texas is on a collision course with Earth. They recruit the best deep core driller in the world, Harry Stamper, to train astronauts who will go to the asteroid, drill into the center and detonate a nuclear warhead.*

Per the Zetas the asteroid excuse has two motivations. First as part of the cover-up, to explain all the debris slinging into the atmosphere lately as fireballs and to deny the objects clearly wafting about between the Earth and Sun at present. And second as an excuse for the elite to head for their bunkers while avoiding the whole sticky problem of explaining why they failed to inform the public about the

presence and pending passage of Planet X.

**ZetaTalk [Comment 3/17/2012](#):** *Near Earth Orbit asteroids are nothing new, and have been a concern of NASA's for decades. In anticipation of the debris in the tail of Planet X, NASA and their partners have been concerned about large objects heading directly toward Earth. Would whole continents be destroyed? Movies such as Armageddon were developed to educate the public for the time when NASA could muster such a defence. But during debates on the sci.astro newsgroup in the late 1990's between Jonathan Tate of the Spaceguard UK and ourselves, they themselves were educated. Attempting to divert, or explode an asteroid would do no good. So why return to warning the public about NEO asteroids? Should the elite need to rush to their bunkers, quickly and perhaps only temporarily, this would be the reason. It's not Planet X, folks, just a NEO scare!*

The establishment has prepared for this time since the early 1980's. They of course had known about the pending passage of Planet X since the time of Roswell in 1947 and had many plans for their personal safety - escape to Mars, underground bunkers, and establishing a New World Order for control in the Aftertime.

#### Near Earth Asteroids

[http://en.wikipedia.org/wiki/Near-earth\\_asteroids](http://en.wikipedia.org/wiki/Near-earth_asteroids)

*NEOs have become of increased interest since the 1980s because of increased awareness of the potential danger some of the asteroids or comets pose to the Earth, and active mitigations are being researched. The United States, European Union and other nations are currently scanning for NEOs in an effort called Spaceguard.*

SOURCE: <http://en.wikipedia.org/wiki/File:Neo-chart.png>

Thus it came to be that Spaceguard UK [engaged the Zetas in debate](#) on the sci.astro usenet, seeking to learn from the Zetas how large hunks of rock might be deflected from Earth. Progress made? They are now sending unmanned probes up to land on asteroids. But beyond that, are no further along then they were in 2001. Even then, when Jonathan Tate of Spaceguard UK engaged the Zetas on this issue, the Zetas did not suffer fools gladly. That also has not changed since 2001.

> No. That's obvious.

No? Each time a planet is perturbed by Jupiter, it gets pulled further out? We've recently had a situation where most of the planets lined up in a line, out from the Sun. This means they were perturbed, not only by Jupiter, but by each other! Please DO point us to the new orbital parameters established for the NEW Earth orbit, the NEW Mar's orbit, etc. etc. Give us a break! They perturb, and return! The perturbation is pre-computed into the orbits, and the orbits are KNOWN upon return!

Well let's take the Sun, for one. The Asteroid Belt goes  
 round and round the Sun, so the Sun's gravity, one would  
 presume, is a factor. A NEO is trash from the Asteroid Belt  
 slung into a different orbit. Are you presuming it no longer  
 cares about the Sun, as a gravity influence? You push it  
 sideways, and it forgets about the Sun? Are we being silly  
 here or what?

You're presuming there are no gravity pulls, not the Earth, not  
 the Sun, just shoving about that is influencing this hunk of rock!  
 It goes in an orbit, just because? Asteroids orbit the Sun, but if  
 you give it a shove, it will forget about that? You cannot  
 REMOVE these influences from that hunk of rock. If you stand  
 it dead still, it will listen to the largest gravity influence that  
 it has at hand, most likely the EARTH. This is real smart, here!  
 Like kicking a grizzly bear in the leg and hoping it does not  
 notice. Now you've got it going in the wrong direction! We  
 will give you the benefit of the doubt here, that you do not mean  
 to eliminate the gravity attractions this hunk of rock listens to,  
 only set it in a different direction around them. How do you do  
 THAT? Ask the Sun to move? Invite Mars over for tea? Even  
 if you create jets galore, you are only moving it TO THE SIDE,

*not changing its relative position to its gravity giants. Over to you, Jonathan TATE.

## Wobble Temps

Mid-March, 2012 the USA had extraordinarily high temperatures, breaking thousands of records. While still technically in Winter, residents of most US cities were wearing Summer garb.

The Living Earth Inc / Earth Imaging, and WeatherUnderground.com

### Over 1600 High Temperature Records Broken in U.S. Over Last Week

March 15, 2012

<http://climatesignals.org/2012/03/over-1600-high-temperature-records-broken-in-u-s-over-last-week/>

*Total Records: 1647*

*High Temp: 1029*

*High Min Temp: 618*

On the same latitude the effects of the wobble can be seen. As the magnetic N Pole of Earth comes up over the horizon to face the Sun and nearby Planet X, it is shoved away by the bully magnetic N Pole of Planet X, as the N Poles of magnets do not like to touch. This causes Alaska, the Sea of Okhotsk just northwest of Japan, and inland in Siberia to be colder than other lands at that same latitude. The eastern half of the US is breaking records, as is Quebec in comparison to western Canada beyond Hudson Bay. High temperatures, and Sweden is extraordinarily warm also. The globe bounces back from the push it had earlier, so these parts of the globe get more sunlight with the Sun high overhead, and are also pushed under tropical air.

## Pacific Compression

Just as the weather wobbles are getting worse, the compression of the Pacific is picking up speed. Notice the sudden drop in water, 25 meters (75 feet) in the Pacific accompanying this recent series of quakes off the coast of Honshu, Japan as noted by buoy 21401. The Pacific Plate subducted under Japan, creating a temporary void in the ocean. Almost simultaneously, the Juan de Fuca off the coast of Oregon also had an adjustment, and in the days following, a dramatic response in buoy 46419. A sudden rise or heap of 33 meters (99 feet) was recorded, followed by a drop of over 20 meters (60 feet) before the water returned to its level. Since this occurred a full two days after the Japan and Oregon quake, buoy 46419 was not reflecting a tsunami, but was showing us activity in the Pacific, where the great Pacific Plate is in fact four segments, as the Zetas have explained. Clearly, the Pacific is compressing.

14-MAR-2012 10:49:24 6.1 OFF EAST COAST OF HONSHU, JAPAN  
 14-MAR-2012 09:08:37 6.8 OFF EAST COAST OF HONSHU, JAPAN  
 13-MAR-2012 10:07:03 4.1 OFF COAST OF OREGON

**ZetaTalk Description 6/2010:** *The Pacific Plate is assumed to be a single plate, but it is not. Hawaii, which rides higher after every major adjustment in the area, is rising, and this can only be the case if there is subduction of a plate somewhere, pushing the plate that Hawaii rides on up.*

## FEMA Demoted

Obama signed a new Executive Order implementing the [Defense Production Act of 1950](#), in place in some form or another since 1950. Due to the Sunshine Law, this would expire if not revisited by a president, and many had done so since 1950 with various revisions. Bush attended to this [in 2003](#). But Obama's new 2012 Executive Order made key changes.

### Executive Order - National Defense Resources Preparedness

March 16, 2012

<http://www.whitehouse.gov/the-press-office/2012/03/16/executive-order-national-defense-resources-preparedness>

*By the authority vested in me as President by the Constitution and the laws of the United States of America, including the Defense Production Act of 1950, as amended (50 U.S.C. App. 2061 et seq.), and section 301 of title 3, United States Code, and as Commander in Chief of the Armed Forces of the United States, it is hereby ordered as follows:*

In 1994 via [Executive Order 12919](#) President Clinton gave FEMA almost unlimited powers in a national emergency, putting them in charge of almost all agencies so that, in essence, if a national emergency were called FEMA could run the country in a martial law type manner. Clinton then issued Executive Order 12938 declaring that the US was in a national emergency situation due to weapons of mass destruction.

## Executive Order 12938 - Proliferation of Weapons of Mass Destruction

November 14, 1994

<http://www.presidency.ucsb.edu/ws/index.php?pid=49489>

*I, William J. Clinton, President of the United States of America, find that the proliferation of nuclear, biological, and chemical weapons ("weapons of mass destruction") and of the means of delivering such weapons, constitutes an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States, and hereby declare a national emergency to deal with that threat.*

The US was, in essence, poised to be under martial law with someone like "Brownie", the [FEMA head](#) during the Katrina disaster, in charge! Obama has just corrected that situation. Remember "Brownie"? The incompetent head of FEMA who combined with the icy Chertoff and partying President Bush (who was playing the guitar in California as New Orleans drown) was what the nation had to count on during Katrina.

**GEORGE W. BUSH***XLIII President of the United States: 2001-2009***Executive Order 13254 - Establishing the USA Freedom Corps***January 29, 2002***GEORGE W. BUSH***XLIII President of the United States: 2001-2009***Executive Order 13268 - Termination of Emergency With Respect to the Taliban and Amendment of Executive Order 13224 of September 23, 2001***July 2, 2002***GEORGE W. BUSH***XLIII President of the United States: 2001-2009***Executive Order 13286 - Amendment of Executive Orders, and Other Actions, in Connection With the Transfer of Certain Functions to the Secretary of Homeland Security***February 28, 2003*

Obama's re-authorizing of the War Powers Act (which covers war and peacetime emergencies) is similar to previous versions in imposing temporary powers over food production and distribution, manufacturing, and a conscripted labor force. But the key difference is removing FEMA from being in charge. In addition to revoking [Executive Order 12919](#) issued by President Clinton, Obama also revoked key sections of [Executive Order 12656](#) by President George Herbert Bush. These give authority to the DOD in certain circumstances. The extent of powers given to FEMA by the Clinton [order 12919 was extensive](#). But Obama in his 2012 act has voided Clinton's act and instead power is given to the chain of command that is topped by and includes the president.

## RONALD REAGAN

*XL President of the United States: 1981-1989*

Executive Order 12656 - Assignment of Emergency Preparedness Responsibilities

*November 18, 1988*

## WILLIAM J. CLINTON

*XLII President of the United States: 1993-2001*

Executive Order 12919 - National Defense Industrial Resources Preparedness

*June 3, 1994*

## WILLIAM J. CLINTON

*XLII President of the United States: 1993-2001*

Executive Order 12938 - Proliferation of Weapons of Mass Destruction

*November 14, 1994*

## BARACK OBAMA

*XLIV President of the United States: 2009-present*

*Sec. 803. Authority. (a) Executive Order 12919 of June 3, 1994, and sections 401(3) (4) of Executive Order 12656 of November 18, 1988, are revoked.*

Almost simultaneously, a new means of assigning a workforce to FEMA in national emergencies has been created by Obama and announced by FEMA. Can this be a coincidence? They may have been denied conscription authority, but they can form a [civilian FEMA Corps](#) with young volunteers 18-24 years of age. Much better.

**ZetaTalk Explanation 3/24/2012:** *It is no coincidence that Obama's new Executive Order revoking FEMA's authorities (in place since 1994) was published almost at the same instant with FEMA's new announcement of a volunteer civilian work force similar to the Peace Corps. Obama is clearly anticipating disasters within the US, but beyond this he seems to be anticipating mischief during a disaster where his authority might be challenged, legally. It is no secret that there are elements within the US - former politicians such as Dick Cheney and members of the Department of Defense - that would like to see martial law declared as soon as possible within the US. The wording of Clinton's 1994 order would allow them to effect a coup, a matter not lost on Obama. Why did Clinton give FEMA such a dominant role, in 1994? As might be inferred from all the rumors about Bill Clinton - his love life and financial self-dealing - he had many matters in his past that could be used for blackmail.*
