Signs of the Times

Moon Wobbles

During the Earth wobble, the Earth moves in space, the magnetic N Pole shoved away by the magnetic N Pole of Planet X and then later bouncing back. Thus objects like the Moon would appear to move in the sky, during wobble points. The Earth wobble shows up on [satellite images](#), as the globe moves under the satellite, the clouds twisting first this way and later that way during the Figure 8 of the wobble. Those who have had opportunity to observe the wobble while looking at the Moon have reported rapid motion in a short period of time. To date this has not been captured on film by the startled observers, but Gordon James Gianninoto quite unintentionally captured the wobble on the evening of July 3, 2012 at 8:26 pm. Jumping up to snap the Full Moon on the horizon, he took a second snap 20 seconds later to ensure a good result, and later was astonished to find he had captured the Moon on the move. Of course, this is the Earth on the move, but to those standing on the surface, it appears the Moon is moving.

These two photos I took from the same camera position within less than one minute apart at sunset on July 3rd, show the moon not rising with the sky at 1 degree each four minutes, but sliding south, without gaining altitude, at least half the diameter of the moon, 1 degree in less than 60 seconds. Normally, any photos of the moon rising would show it going up in the next frame, 1 degree every 4 minutes with the sky. But here we have the moon moving horizontally more than 1 degree and not gaining any elevation, in two consecutive photos both saved as being taken in the same minute, 8:26 pm July 3rd, 2012. The camera is a 14 MP and it processes the image, displays it on the LCD screen, and is ready to take another picture about no more than 20 seconds later than the first. Perhaps 10 seconds. I wanted to take the photos and run back inside to avoid the bugs. I did not change the zoom, the focus, or the exposure. I did not delay between photos. About 6 months ago, I saw Orion rise in the NE, then Sirius, and went in for half an hour. When I went back out, Orion and Sirius had not risen one bit but had slid about 75 degrees to the south. That was from the wobble as well.

At 8:26 in New England, on July 3, 2012, the Moon is in the SE. The globe, in the midst of its Figure 8 wobble, has the Sun high noon over the Pacific. The Figure 8 wobble moves in such a way that the view toward the SE from New England would have the globe moving up, under the Moon, such that the Moon would appear to jump to the right and drop. This coincides with what Gordon captured, the Moon suddenly jumping to the *right* as he pointed his camera at the rising Moon at Azimuth 127, in the SE. The Ecliptic in the view from New England is slanted from lower left to upper right. The Moon should very slowly move along the Ecliptic *rising*, not dropping or remaining in place, as the evening progressed. It certainly should not jump directly to the right in less than a minute.

The Zetas have predicted a more severe and detectable wobble, in the war on the cover-up, with the wobble increasing and the rate of increase accelerating.

ZetaTalk [Observation 6/16/2012](#): *The Council of Worlds has threatened a series of shocks increasingly devastating to the cover-up. The presence of Planet X was frankly obvious during the recent lunar eclipse and Venus transit, and the Earth wobble is raising questions even among those who do not look to the skies. They're not going to go away, they're going to continue.*

ZetaTalk [Observation 7/14/2012](#): *Progress in this matter is gradual, as the establishment can see this will not last forever and evidence handed to the common man has an upward and exponential trend. The Earth wobble has been increased so that the Sun almost appears to rise in the North at times, and the Moon Swirls of Planet X are visible naked eye around the Sun, seen by many and captured on video. What goes on in the minds of those at the helm in the establishment when they realize the common man can absolutely ascertain the Earth wobble by the position of the Sun, and are doing so! There has been steadfast erosion in the ranks. This trend has pock marked the ranks of the establishment determined to maintain the cover-up so that it looks like Swiss cheese, rather than a wall of solid determination.*

Second Great Depression

At the start of the ZetaTalk saga, the Zetas predicted the world will fall into a Second Great Depression. In December, 1999 they predicted the Stock Market collapse that occurred in 2008. In July, 2002 they predicted the bursting of the real estate bubble, which peaked in 2006 and then rapidly collapsed, and asserted the world was in fact already in a Second Great Depression. The state of the economy at that time was covered in [Issue 110](#) of this newsletter on December 21, 2008, at the end of the Bush administration. In December, 2008 the Zetas reiterated their depression prediction and asserted by 2012 the world would be overtaken by the Earth changes associated with the pending Pole Shift, and unable to pull itself out of the economic depression. Certainly, in 2012, weather related disasters, crop shortages, and bankruptcies are at an all-time high - worldwide.

ZetaTalk Prediction 12/15/1999: *Between the present and when there will surely be a crash of banks that cannot be sustained and the barter system essentially returns, there is an end game in play. Most stocks are inflated beyond their value, very few are not, and they can fall to 1/4 of their value before they settle with the public feeling they have some confidence in the stock and that it cannot be worth less.*

ZetaTalk Prediction 7/20/2002: *The real estate bubble will likewise burst when the current weather problems and lack of insurance coverage prove this to be hollow. The percent of the workforce to be affected is already increasing, and look to the Depression era, worldwide, for expected results. During the coming depression, which is in fact in place but denied by the media and powers that be, one should look to the past Great Depression as an example of things to come.*

ZetaTalk Prediction 12/13/2008: *The world will not emerge from this second Great Depression as it did the last. The reasons are many fold. The pole shift will overtake the world prior to 2012, and going into that time disasters will be increasing, insurance companies will be going bankrupt, crop failures will be increasing and illness will be increasing. The outcome will be different this time because any success will be societal, in Service-to-Other communities who will eventually merge with high tech alien centers operating in the Service-to-Other orientation.*

But as confidence is the name of the game, everyone from bankers to politicians have denied the depression label and called it a recession, or a double dip recession, or some other term. Due to FDIC protecting bank accounts, and unemployment insurance helping those put out of a job, and the welfare blanket that was primarily not in place during the first Great Depression – this avoidance was possible. But now the term is belatedly getting headlines!

How Close Are We to New Great Depression?

July 16, 2012

<http://www.cnbc.com/id/48193471>

The risk of a new depression — a sustained, severe recession — has struck fear into the heart of markets and driven monetary policy in developed economies since the current financial crisis began. When we broke the link between money and gold, this removed all constraints on credit creation. This explosion of credit created the world we live in, but it now seems that credit cannot expand any further because the private sector is incapable of repaying the debt it has already, and if credit begins to contract, there's a very real danger that we will collapse into a new Great Depression. The explosion in cheap credit has been widely blamed for the global financial crisis, but the debate about how to fix the problem continues. The increase in government debt is making total debt grow, otherwise we would already have collapsed in to a debt-deflation death spiral.

Cover-up Collapse

The Zetas have recently predicted that the cover-up over Planet X will be ending, most likely by an announcement by Obama that Nibiru is indeed in the inner solar system and causing the magnetic interference, the Earth wobble, and the wild weather extremes. He will of course stop short of saying the

Zetas were right all along.

ZetaTalk Prediction 6/16/2012: *What would be the outcome of admitting that there is a planet in the inner solar system? They could make a general announcement. They could have Obama make this. He could explain that the issue had been under security directives to avoid panic but that it is coming closer and becoming more obvious and they feel that the public needs to know. They could present diagrams showing where Planet X is positioned, and explain what it's doing to the Earth, causing the wobbling and weather changes. They would say they're not sure what the outcome will be but that the public will be kept informed, then walk off the podium and let some scientist take over to explain all the details.*

ZetaTalk Prediction 7/14/2012: *Council of Worlds is facing off against the cover-up. Who is winning and who losing, and how might this end? Most of the battle is behind the scenes, in the consciousness of the public and the discussions in smoke filled rooms of the establishment. Contactees, who are now of a number approaching billions, are aware of the presence of Planet X and that their governments and in many cases their religious leaders have been lying to them. Those in charge of the cover-up are becoming increasingly polarized, which was frankly expected in situations like this, so that even as it weakens it appears, on the surface, to be hardening. Progress in this matter is gradual, as the establishment can see evidence handed to the common man has an upward and exponential trend.*

What will emerge, on the media, after the announcement? One can sense the rustling around as various Internet personalities try to arrange a place on the stage, as someone who predicted this, who was warning the public all along, or who was caught (poor things) in the demands of the establishment that they lie, lie, lie to the public. We will certainly have NASA, now explaining where Planet X is at present and giving us updates on its progress. Never mind that they singled Nancy Lieder out as the person *not* to listen to, in the past. Both [Don Yeomans](#) and [Dick Morrison](#), senior men at NASA, made it a point to mention me by name as the one person you should NOT listen to. Perhaps the Bad Astronomer guy, [Phil Plait](#) will be happy to explain why his website has dripped with ridicule all these many years. Just doing his civic duty, you know! And then there are the many who have claimed Planet X either is not real or claim it is out near Jupiter, even though photographic evidence shows the Moons of Planet X wafting between the Earth and Sun. The establishment no doubt will try to arrange preferential treatment of their lap dogs, but is there any evidence on what their preferences might be? Surprisingly, it seems they do *not* want military leaks to be on that list!

The John Moore show, 11 July 2012. A soldier in the military gave John Moore a call 10 July (according to the show) telling him that the last week the military have been conducting briefings for soldier families living on the East, West and Gulf Coast of the US. The soldiers were told about a planet that have entered the solar system called Nibiru and are to be causing very severe problems, much worse than what the world now is experiencing. Their families should prepare and be put on standby and ready to leave with little notice. So my question is: Why are they now informing military personal (if the show speaks the truth)? Is it an altruistic action or another agenda in play here? Clearly they are not informing the public. [and from another] <http://www.youtube.com/watch?v=fjCrehCZc9c> private and trusted source ... These kind of briefings would take place .. 6 weeks to 3-4 months ahead at most ... my source .. both mature men and both Viet Nam vets ... my source is not the dependent ... the original source does not even know they are a source.

ZetaTalk Prediction 7/21/2012: *John Moore's source was provided false information to embarrass John Moore, and discredit him. Given that the cover-up is so tense, the fear of a breach among those in the know so heightened that anyone even suspected of planning to leak information to the public is killed, what is the likelihood that dependents in the US military, en mass, would be informed? The concept is ludicrous, and anyone entertaining the concept a fool. The cover-up is poised to make an announcement, by Obama, a worldwide broadcast announcing the presence of Nibiru, aka Planet X, nearby. When such an announcement is made, the cover-up is most concerned about maintaining control of the message. In*

that ZetaTalk has been on target since its birth in 1995, even tracking Planet X into the inner solar system in 2003 with documented evidence, it cannot be disputed. It is also too widely known to be eliminated and has proven resistant to being discredited. But there are dozens of individuals, generating their own prophecies and garnering their own following, who will try to grab the stage. The cover-up wants to be the voice that is listened to, in control of the message, and thus these other human sources of information are being taken down, ahead of time.

Drought and Deluge

Knowing that the Earth wobble would develop after Planet X entered the inner solar system in 2003, the Zetas made some astonishingly accurate weather predictions at the start of the ZetaTalk saga in 1995. It is the wobble, and its effect on tides and air currents, that is causing the weather extremes and trends, and they knew the wobble was coming.

ZetaTalk Prediction 7/15/1995: *All attempts to explain the changes based on Global Warming from the Greenhouse effect will run into snags as the weather will refuse to be predictable. Areas of the world which have been deserts throughout mankind's memory will become swamps under constant and repeated rains. Temperate climates used to periodic gentle rainfall will suffer intractable droughts. Then this will switch about, for no apparent reason.*

ZetaTalk Prediction 7/29/2005: *We warned at the start of ZetaTalk, in 1995, that unpredictable weather extremes, switching about from drought to deluge, would occur and increase on a lineal basis up until the pole shift. Where this occurred steadily, it has only recently become undeniable. ZetaTalk, and only ZetaTalk, warned of these weather changes, at that early date.*

Has this occurred? Just compare the drought map of the US in [June, 2007](#) to the current [2012 drought map](#). The drought is threatening to [cripple the ability](#) of the US to feed itself.

America burning: Drought Devastating 26 States is the Largest Natural Disaster Area in U.S. History
July 12, 2012

<http://www.dailymail.co.uk/news/article-2172931/Drought-devastating-26-states-largest-natural-disaster>
Severe drought conditions plaguing more than half of the United States has developed into the largest natural disaster area in the country's history. The United States Department of Agriculture declared natural disasters for 26 states and more than 1,000 counties because of the extreme drought that has destroyed crops in farms throughout the nation.

Widespread Crop Failures Likely in U.S. this Summer
July 5, 2012

<http://etfdailynews.com/2012/07/05/agriculture-record-heat-and-drought-is-devastating-crops>

The lack of rainfall nationally has caused drought conditions from coast to coast. If temperatures continue to stay this high and we don't start seeing more rain, farmers and ranchers all over the nation are going to be absolutely devastated. So what happens if we do see widespread crop failures throughout the United States? That is a question that is frightening to think about.

Deluge has likewise worsened just recently. Case in point is the [deadly floods in Japan](#) the storms in Edmonton with humongous hail, the storms in the [Czech Republic](#) likewise with humongous hail, and a deluge in Moscow so sudden the cars were covered in an instant. Note the dates on the article, ranging from July 5-13, 2012, a period of a week where deluge, humongous hail, and lightning storms occurred all while the US is so dry that half the states are being declared a national disaster region. Clearly, the Zeta prediction on drought and deluge has proved true.

Japan: Deadly Floods and Landslides hit Kyushu, at Least 10 Killed, 20 Missing
July 12, 2012

<http://www.rt.com/news/japan-rains-evacuation-floods-031/>

At least 10 people died, 20 were missing and 50,000 were ordered to evacuate as the heaviest rainfall on record pounded Oita and Kumamoto prefectures in northern Kyushu. Emergency workers in Kumamoto Prefecture responded to multiple reports of mudslides swallowing houses and people being trapped, with access roads blocked by mud or gushing water. Self-Defense Force troops have been deployed with nearly 100 millimeters of rain falling in a hour in some areas. Particularly in Kumamoto and Oita prefectures, we are seeing the heaviest rain that (the region) has ever experienced.

Massive Storm Floods Edmonton Streets

July 12, 2012

<http://www.cbc.ca/news/canada/edmonton/story/2012/07/12/edmonton-thunderstorm-flooding.html>

Firefighters spent much of the morning rescuing people from submerged vehicles, with at least 18 cars becoming trapped due to rainstorm. Epcor reported 15 electrical circuits knocked out by lightning.

Extreme Storms and Record High Temps in the Czech Republic

July 6, 2012

<http://zpravy.idnes.cz/bourka-v-jiznich-cechach-0wl-/domaci.aspx?>

On the contrary, Moravia had temperature records. A very strong storm swept through South Bohemia. The storms are very strong gusts of wind speeds of up to 90 miles per hour and hail. In Moravia, the situation was different, there fell temperature records.

Freak Storm Batters Moscow, Cars Swamped by Floods

July 13, 2012

<http://www.rt.com/news/moscow-rain-storm-effects-122/>

A brief but ferocious thunderstorm flooded the historic center of the Russian capital on Friday. Cars had to plow through more than a foot of water and three people were killed by lightning. The rain lasted less than half an hour, but flooded more than a dozen streets.

Is Global Warming the cause? The Zetas likewise made it clear from the start of the ZetaTalk saga that this was a cover for the Earth changes caused by Planet X. From the start, scientists were silenced while the UN, Al Gore and the British scientists at the helm of the scam claimed noisily that *all* scientists agreed with the claims. Then Climategate broke in November, 2009 revealing that fraudulent data has been used to promote the theory. Now that the weather and other evidence is proving the Global Warming theories increasingly untenable, scientist are speaking out. We can only hope that those scientists suppressed by the cover-up over the presence of Planet X become as courageous.

“Climate Science” in Shambles: Real Scientists Battle UN Agenda

July 13, 2012

<http://www.thenewamerican.com/tech/environment/item/11998>

More than 31,000 scientists in the United States have signed a petition urging the U.S. government to reject the kinds of AGW policies proposed by the UN and environmental extremists. There is no convincing scientific evidence that human release of carbon dioxide, methane, or other greenhouse gasses is causing or will, in the foreseeable future, cause catastrophic heating of the Earth’s atmosphere and disruption of the Earth’s climate. More than 1,000 internationally renowned scientists have gone further; they have not merely signed a petition, but have made public statements challenging key claims of the AGW alarmists. Forget any notion that 4,000 scientists supported the claim or even the 3750+ people as mentioned by the IPCC. Also forget any notion that all 2890 individuals who were authors, reviewers or both supported the claim. The only explicit evidence is for support from just less than 60 individuals.

ZetaTalk Comment 6/25/2011: *How to salvage the Global Warming excuse? This has been the darling of the cover-up crowd, the reason for the erratic weather, the high tides and rising seas, even the reason the world’s populace should shift to a more vegetarian diet and less reliance on fossil fuels. Poorly managed,*

this ultimately was revealed for the hoax it is, data manipulated at the highest levels. Now those who have been hurt by legislated demands that they adjust their carbon footprint are furious and demanding blood. Should Al Gore apologize? The Global Warming hoax marched past the revelation of their fraudulent data and they will march past lack of cooperation from Obama, holding firm as the alternative is unthinkable. The alternative is humiliation, but more than that it would raise the question of why such a fraud was considered necessary. However, apologies will not be forthcoming due to the humiliation factor, even when the presence of Planet X is obvious.
