**Signs of the Times**

### **Annunaki Bloodline**

The Annunaki are genetically close enough to man to be able to interbreed, and have done so in the past while they occupied Earth to mine for Gold, slave masters over early man whom they put into the mines. Per the Zetas, David in the David and Goliath legend was a half-breed, fighting a full-blood Annunaki in Goliath.

**ZetaTalk Explanation 7/15/1997:** *Most often, a female slave that had been impregnated would die in childbirth, unable to deliver an oversized infant, taking her infant with her. On rare occasions half-breeds survived, often without their mothers who bled to death or were torn beyond repair. David's mother, like he, bore genes from a half-breed, and thus had the hips to bear the product of rape and live.*

Annunaki genes are thus present in the population, and Annunaki hybrids have and do exist in remote areas on Earth, as was recently discovered [near Patagonia](#).

<http://www.youtube.com/watch?v=w0eu9ldGwWM>

**ZetaTalk Comment 2/4/2012:** *When this hybrid cluster encountered European explorers, they like the American Indians recognized a threat to their existence, though at first they greeted the explorers and were curious. They withdrew, and have kept themselves separate from strictly human society to avoid hostile reactions.*

Should it be any surprise then, that yet another cluster of Annunaki-human hybrids has been discovered? In the past, the Qiang people in China were over 7 foot tall and had odd front teeth in their narrow lower jaws, as archeological digs show. The mummies are dated to approximately 3,800 years ago, in recent times, and had a dairy diet not unlike the Mongols of today.

### The Mystery of the Xiaohe Mummies in China

June 23, 2013

<http://www.ancient-origins.net/ancient-places-asia/mystery-xiaohe-mummies>

*The coffins were made of wood and shaped like boats, buried upside down, which is similar to the Egyptian concept of the boat to take the Pharaohs to the land of the 'Gods'. Dating of the area has shown that it goes back to approximately 2,000 BC and they appear to be of Caucasoid origin. However DNA analysis of the bodies have shown that it is a mixture of population from East and West. The males were found to have chromosomes usually found in Northern and Eastern Europe and DNA found in Siberia.*

### World's Oldest Cheese Found On 3,800-Year-Old Mummies Buried In China

March 1, 2014

<http://www.huffingtonpost.com/2014/03/01/worlds-oldest-cheese-mummies>

*The mummies, which are each about 3,800 years old, were buried with hunks of the dairy treat, presumably a tasty snack for the buried to enjoy in the afterlife. Makers likely fermented this cheese using microbes such as Lactobacillus and Saccharomycetaceae yeasts, which are commonly used to make the still-popular fermented dairy beverage known as kefir.*

### Archaeologists Announce Qiang People had Vertically Oriented Teeth and Longer Skeletons

February 16, 2014

<http://www.ancient-origins.net/news-evolution-human-origins/qiang-people>

*The skull shows an unusual characteristic in which the teeth are vertically oriented instead of horizontally. In addition, the researchers have revealed that the skeleton recovered from the tomb measured a massive 2.3 metres (7 feet 6 inches). That skeleton is 4,000 years old and belonged to the Qiang people, an ethnic group of China who live mainly in mountainous region in the north-western part of Sichuan province on the eastern edge of the Tibetan plateau. The Qiang people have been recognised as a 'first ancestor' culture due to their ancient roots. Interestingly, the region where the tomb was uncovered is in the same region where the well-known Tarim mummies with Caucasoid features were recovered. The mummies were found to have typical Europoid body features (elongated bodies, angular faces, recessed eyes), and many of them have their hair physically intact, ranging in*

*colour from blond to red to deep brown. Like the Qiang skeleton, the Tarim mummies were also found to be very tall.*

The Anunaki are large, as their home planet has a 50% stronger gravity pull than Earth. Considered giants, they are close to 8 foot tall, muscular but not with bulging overdeveloped muscles, and not given to being obese. Their faces are long and thin.

**Mars Doll Face**

**ZetaTalk Description 7/15/1995:** *The giant hominoids were not grossly muscular, as mankind's overdeveloped muscle men are. They were and are well proportioned, with rounded muscles but without the extreme bulging that muscle-men try to achieve. The giant hominoids had long faces.*

**ZetaTalk Insight 7/15/1997:** *Ancient Egyptian gods, ancient Babylonian gods, the Vizigoths of Germany, ancient Mayan and Incan gods, are almost to a one particular individuals from the 12th Planet royalty, stationed on Earth to supervise mining operations. Stories about ancient rebels, notable for their stature and courage in battle, are also frequently based in part on the heritage from these visitors, as the rebel most often carried some genetics from the rape of a female slave who managed somehow to escape and bear her oversized infant alive. The legacy today is genetically disbursed throughout the mid-eastern countries, Germanic countries, and the south seas, and is identifiable in those humans who simultaneously possess a large stature, a fierce temper, and strong musculature. Rather than being considered gods, they are often considered criminals.*

The Zetas have described the Annunaki stature and temperament, but have never addressed their teeth! The issue never came up. But given that their faces were long and thin, might their lower jaws have had an adaptation that early man did not?

**ZetaTalk Insight 3/8/2014:** *Clearly these Qiang people, tall and with white skin and odd front teeth, were not just a combination of early man, migrating from Europe and merging with China Man. That their lifestyle as living on dairy has a match in Mongolia is clear. The Mongols likewise have a diet heavily reliant on dairy products. Their DNA has been matched to that from northern Europe. But what of the narrow front jaw with lower front teeth placed sideways. In modern humans, a tight jaw space creates overlapping lower front teeth, not a neat arrangement where the teeth are placed sideways. This, combined with the tall stature, suggests a mix with Annunaki DNA, and this suggestion is correct. The ancient Qiang had a heavy dose of Annunaki DNA, with the sideways placement of teeth in the narrow*

*lower jaw so typical of the Annunaki, and the tall lanky stature of the Annunaki . This has since been muted, among the Chinese and Mongols, by constant interbreeding.*

Can the evidence of this Annunaki blood be seen in Mongolia today? They are a hardy people, and many have a thin, pointed jaw, unlike the round faces typical of the Chinese people.

The Qiang people live today on the Tibetan Plateau, just south of Mongolia.

Genghis Khan of course came from Mongolia, his Mongolian hoard rampaging across the Eurasian continent from coast to coast. His leadership was noted for intelligence and brutality toward the vanquished – both of which might be considered Annunaki traits. Genetic research reveals that DNA from this Mongolian hoard can be found in the countries occupied, so it is not just the Qiang people who carry this DNA!

**Qiang People**

[http://en.wikipedia.org/wiki/Qiang\\_people](http://en.wikipedia.org/wiki/Qiang_people)

*The Qiang people live mainly in mountainous region in the northwestern part of Sichuan province on the eastern edge of the Tibetan plateau.*

### Ghenghis Khan

[http://www.newworldencyclopedia.org/entry/Genghis\\_Khan](http://www.newworldencyclopedia.org/entry/Genghis_Khan)

*Genghis Khan (1162 – 1227), the founder of the largest contiguous land empire, the Mongol Empire, ever established. He united the Mongol tribes and forged a powerful army based on meritocracy, and became one of the most successful military leaders in history. Genghis Kahn's forces were practically invincible, as they combined mobility, discipline, adaptability, strategy, strength, and endurance in direct battle with skills in intelligence gathering, psychological warfare, siege warfare, and superb communications. Their battles were brutal. The Mongol Empire ended up ruling, or at least briefly conquering, large parts of modern day China, Mongolia, Russia, Ukraine, Korea, Azerbaijan, Armenia, Georgia, Iraq, Iran, Turkey, Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, Afghanistan, Turkmenistan, Moldova, Kuwait, Poland, and Hungary.*

### Genghis Khan a Prolific Lover, DNA Data Implies

February 14, 2003

[http://news.nationalgeographic.com/news/2003/02/0214\\_030214\\_genghis.html](http://news.nationalgeographic.com/news/2003/02/0214_030214_genghis.html)

*Genghis Khan, the fearsome Mongolian warrior of the 13th century, may have done more than rule the largest empire in the world; according to a recently published genetic study, he may have helped populate it too. Khan's empire at the time of his death extended across Asia, from the Pacific Ocean to the Caspian Sea. His military conquests were frequently characterized by the wholesale slaughter of the vanquished. His descendants extended the empire and maintained power in the region for several hundred years, in civilizations in which harems and concubines were the norm. And the males were markedly prolific.*

### Aftertime Postures

How much of the border tensions emerging around the Ukraine and the East China Sea are due to Aftertime posturing? The Ukraine turmoil is cast as being due to ethnic loyalties and a historic Russian naval base in the Crimea. The East China Sea conflict is cast as due to fishing rights and the potential of oil deposits. The US is a debtor nation and must shrink its military due to budget cuts. But per the Zetas, to understand these conflicts and adjustments, one must also look to Aftertime posturing.

### Russia and China Stand in Agreement on Ukraine

March 3, 2014

<http://www.prisonplanet.com/russia-and-china-stand-in-agreement>

*Russia and China hold approximately 25 percent of all foreign-owned U.S. debt, and if they started massively dumping U.S. debt it could rapidly create a nightmare scenario. In addition, it is important to remember that Russia is the largest exporter of natural gas and the second largest exporter of oil in the world. And China now imports more oil than anyone else on the planet does, including the United States. If Russia and China got together and decided to kill the petrodollar, they could do it almost overnight. So when it comes to Ukraine, it is definitely not the United States that has the leverage.*

#### China Says Military will Respond to Provocations

March 4, 2014

<http://news.yahoo.com/china-says-military-respond-provocations>

*China supports resolving disputes through negotiations and its 2.3 million-member People's Liberation Army — the world's largest — is for defensive purposes only. Remarks came amid festering disputes between China and its neighbors over the control of islands and sea lanes in surrounding oceans. There has been a sharp escalation of tensions with Japan in the past 18 months over control of a string of tiny uninhabited islands in the East China Sea. China is to announce its latest defense budget on Wednesday. Spending on the armed forces rose 10.7 percent last year to 720 billion yuan (\$114 billion), the most for any nation apart from the U.S.*

#### Why Are China and Japan Inching Toward War Over Five Tiny Islands?

February 25, 2013

[http://www.slate.com/articles/news\\_and\\_politics/view\\_from\\_chicago/2014/02](http://www.slate.com/articles/news_and_politics/view_from_chicago/2014/02)

*But since the early '70s, China has argued that Japan seized the islands in violation of international law. China argues it owned the islands before 1895, based on some ancient Chinese texts and maps that it says show that the Chinese regarded the islands as theirs, which would mean Japan's seizure of the islands violated China's rights.*

#### Pentagon Plans to Shrink Army to Pre-World War II Level

February 23, 2014

<http://www.nytimes.com/2014/02/24/us/politics/pentagon-plans-to-shrink-army>

*Defense Secretary Chuck Hagel plans to shrink the United States Army to its smallest force since before the World War II buildup and eliminate an entire class of Air Force attack jets in a new spending proposal that officials describe as the first Pentagon budget to aggressively push the military off the war footing adopted after the terror attacks of 2001.*

The Earth changes during the 7 of 10 plate movements will bring the migration and sociological changes anticipated as part of the 8 of 10 phase, which can be seen from the [distribution of the world's population](#) and the anticipated Aftertime flooding.

**ZetaTalk [Insight](#) 3/8/2014:** *How does the timing of the announcement admitting the presence of Nibiru, aka Planet X, relate to the current turmoil in the Ukraine, the ongoing dispute between China and Japan over East China Sea islands, and the US decision to reduce its troop size to levels not seen prior to World War II? Side issues can be cited, such as divided loyalties in the Ukraine and the Crimea as a Russian naval base, and such as fishing rights or oil deposits in the East China Sea, and the budget cuts the US has been forced to make. But to understand the real motives behind these actions, one must look to migration concerns on the post announcement map.*

*One has only to look at the Aftertime map compiled by Nancy at the start of the ZetaTalk saga to understand why both Russia and China are braced for immigration assaults in the midst of their own internal migration struggles. Almost the entire eastern portion of Russia will be under water in the Aftertime. The population of Russia, estimated at 150 million, is clustered in the West, and must be moved. This move includes Moscow and the Kremlin. Russia is making it clear that it will not allow European nations to take advantage of it during the anticipated flooding.*

*China has a massive population, estimated at 1.4 billion, and likewise must move this population from its populous coastline, which will flood. This includes Beijing, the political center of China. China must likewise be concerned about the climate change that will descent on its southern provinces when India becomes the globe's new S Pole. This is another population shift of immense proportions. China has made it clear in its stance in Tibet and in the East China Seas that it does not intend to let those drowning in India, Bangladesh, and Indonesia migrate to high land in China. Where will the combined population of these drowning countries, estimated at more than 1.6 billion, go?*

*Countries that have looked to the US for protection, such as Japan and Europe under alliances following World War II, must anticipate that the US will look to its own needs as the Earth changes stress the US during its budgetary crises. The US can no longer be the world's big brother, protector, or police force. The US will be afflicted with Aftertime and Pole Shift flooding. The south-east US will be pulled down into disasters and flooding well before the Last Weeks. The East Coast of the US is its most populous area. The US will be hit with a New Madrid adjustment that will leave it reeling, distribution lines across the Mississippi that include gas and oil from the Gulf disrupted permanently. Where the US has friendly neighbors in Canada and Mexico, they are a target nation by much of the world as they have until recently been considered the most prosperous nation in the world. This legacy will hurt them during the coming times.*

## **ZetaTalk Outreach**

Two new Mirror Sites have been recently added. A second mirror in Africa [in Namibia](#) hosted by [Africa Online](#), the largest ISP in Africa. Based in Kenya, Africa Online stretches across ten African countries via land lines, giving broad access of the ZetaTalk message even when coastal cables might be ripped and the satellites torn from the skies. Our first African mirror is in S Africa. A second mirror has been established in S America in [Colombia](#). Our first S American mirror is in Argentina, stretching overland up through Brazil and down to the tip of S America. Given the extensive flooding anticipated in the Amazon, and given the damage that might be done to land lines in the Andes subject to mountain building, a second mirror physically located in the northern portion of S America was sought. Given the key role of

Colombia as a migration hub on high land in the Aftertime, the second S American mirror is thus being hosted in Colombia by Conexcol. This mirror will also serve the Caribbean islands and Central America, as well as the entire upper half of S America.

A [ZetaTalk mirror](#) has also been established on Google, with a facility to download onto mobile devices with automatic updates. Courtesy of the Russian team!

*[ZetaTalk is now on Google, supported by an anonymous volunteer from Russia! The Google Mirror Site can be viewed directly. Your mobile device can also have the Mirror Site installed. Follow these Installation Instructions. Your mobile device can also be set for Automatic Update, so that it is instantly updated automatically.](#)*
