

**“CookKit”** We couldn't have done the project without the new design. That's really the bottom line. For the cost of one box cooker we could have 25 panel cookers. We were able to spend all our time on how to use the cooker. We didn't spend any time on construction. You just fold it up and insert the two tabs into the slots and that's it.

**Production of the Cookers** The cardboard manufacturer takes a large roll of corrugated cardboard, laminates aluminium foil on one side, and sprays a waterproofing lacquer on the other side. This is then die-cut to form the cooker, complete with the folds and slots. Then they are bundled into lots of 25 (which is about as large as one person can handle).
